

## Congratulations on your leadership appointment—welcome to the collaborative!

The Medical Officer Collaborative, jointly sponsored by WSMA and WSHA, provides a forum for senior physician leaders from medical groups, hospitals, and health systems across the state to collaborate on quality, patient safety, and leadership.

It takes strong leadership to create meaningful change in practice. This learning collaborative provides a safe place to openly discuss the challenges physicians face and outline effective solutions to those challenges.

WSMA and WSHA continually strive to enhance patient quality and safety with current evidence-based comprehension and skill. Physician leaders' insight, judgment, and credibility shape our health care delivery systems for the betterment of all patients. Together, we are committed to collaborating to enhance health care quality and safety for our communities.

### WHAT PEOPLE ARE SAYING:

- “ There is no other forum like this for CMOs and VPMAAs.”
- “ I leave each safe table with a list of new strategies and ideas.”
- “ Having this direct connection to my peers who are wrestling with the same issues and who are willing to share their lessons-learned is invaluable.”
- “ I appreciate that this is, indeed, a safe table, where I can openly discuss challenges and benefit from the experience of my peers.”

## Safe Table Learning Collaborative for Medical Officers

### WHO:

Senior physician leaders, e.g. CMOs, VPMAAs.

### WHERE:

The Conference Center at SeaTac Airport.

### WHEN:

Three times per year.

### WHY:

- › To share experiences and strategies to improve practices.
- › To network with other senior physician leaders.

### PRIORITY TOPICS:

- › Patient safety and quality
- › Wellness, burnout, and impairment
- › Leadership development
- › Public policy
- › Culture change
- › Shared challenges all CMOs face
